

TANVIR AJAM AUTI

☎ +91-9850596168 ✉ tanvirauti2620@gmail.com 🌐 www.linkedin.com/in/tanvir-auti-408827250

Summary

Data Analyst and Developer with a strong foundation in SQL, Python, Excel, Power BI, and full-stack application development. Skilled in cleaning, analyzing, and visualizing data to generate insights and support data-driven decision-making. Experienced in building desktop and web-based management systems using Python, Java, Flask, React.js, MongoDB, and SQLite. Interested in collaborating on meaningful analytical and development projects in fast-paced environments.

Skills

Programming & Querying: Python, Java, SQL, C++, PostgreSQL

Data Visualization Tools: Advanced MS Excel, Google Sheets, Power BI

Analytical Abilities: Data Cleaning, Exploratory Data Analysis (EDA), Insight Generation, Descriptive Statistics

Experience

Autograder intern

May 2025 – July 2025

Upgrad (Remote)

Tools Used: Excel, Word, google-sheets, Python

- **Handling the LLM**
- Updating guidelines for the LLM
- Solving data related issues for the LLM.
- testing of the LLM.
- Collaborated with team of 8 - 2 managers and 6 colleagues

Programmer intern

January 2025 – July 2025

Innovatus Technologies (Remote)

Tools Used: Java, Python

- **Training regarding Java, python**
- Developed Java and Python modules
- reporting to the team lead.

Projects

ML and Deep Learning approaches for Sentiment Analysis of Amazon Reviews | *Python* July 2024 – June 2025

- **Analysed 1.5M Amazon reviews to extract insights and improve customer experience. (Research paper published on IEEE Xplore)**
- Models: Logistic Regression, Random Forest, Neural Networks.
- Generated visualizations (histograms, confusion matrix, barplots)
- Research paper link- <https://ieeexplore.ieee.org/document/11052005>
- Created dashboard using PowerBI for insights.

Fake news detection using Machine learning | *Python*

March 2024 – May 2024

- Models: Logistic Regression, Decision Tree, Random Forest.
- Achieved high accuracy in detecting misleading news articles.

E-Commerce Website with DevOps Technologies |

July 2024 – November 2024

- Tools: Docker, Git, Jenkins, Google Cloud.
- Built a scalable website as part of a learning initiative.

Data Analysis Dashboard | *Python, Streamlit, Pandas, MySQL*

April 2026

- Developed an interactive analytics dashboard for CSV/Excel data visualization and KPI tracking.
- Implemented automated EDA, forecasting module, PDF reporting, and filtering/search functionalities.
- Integrated charts, statistical summaries, and database storage for analytical reporting.

Point of Sale (POS) System | *Java, SQLite*

April 2026

- Developed a POS system for billing, inventory handling, and sales management.
- Implemented product management, invoice generation, and customer billing functionalities.
- Integrated database connectivity and optimized transaction processing for retail operations.

Smart Hospital Management System | *Python, Tkinter, SQLite*

April 2026

- Developed a desktop-based hospital ERP system with secure login and role-based access control.
- Implemented Patients, Doctors, Appointments, Billing, and Staff Management modules with full CRUD operations.
- Generated PDF billing receipts and packaged the application into an executable (.exe).

Awards & Certifications

- **Complete Data Analyst Training: Python, NumPy, Pandas, Data Collection, Preprocessing, Data Types, Data Visualization – Udemy 2025:** SQL, data cleaning, dashboards, and presentations.
- **The Project Management Course: Beginner to project Manager - Udemy 2025:** SDLC, Agile methodology, Excel, Jira.

Education

B.tech. Computer Science

Symbiosis Institute of Technology, Pune

Graduated: 2025

CGPA: 7.2 / 10

Diploma in Computer Technology

Government Polytechnic, Solapur

2021

Percentages: 88.40
